

## Table of contents

Development of the Schroth rotational breathing system . . . . .	1
Sample of early brochures and booklets . . . . .	3

### PART A

Theoretical basis of the Schroth Method . . . . .	9
I. Division of the trunk (including shoulders and neck) into three segments . . . . .	11
II. Symmetrical postural deviation in the sagittal plane. . . . .	12
III. Postural deviation in the frontal plane . . . . .	17
IV. The three torsions of the trunk in scoliosis. . . . .	19
V. Breathing as a formative factor . . . . .	20
VI. The scoliotic breathing pattern. . . . .	23
VII. Increase in cardiopulmonary capacity during three-dimensional treatment . . . . .	24
VIII. Effect of sun and air . . . . .	24
IX. Evaluation of spinal length loss in scoliosis in relation to vital capacity. . . . .	25

### PART B

Evidence-based theory . . . . .	27
I. Influencing the scoliotic wedges with the aim of restoring rectangular blocks . . . . .	29
1. Planes and axes of the body . . . . .	29
2. Conceptual division of a three-curve scoliosis . . . . .	30
3. Principle of pelvic corrections in three-curve scoliosis . . . . .	30
4. Corrections of deviations in the sagittal plane: postural improvement, first and second pelvic correction . . . . .	30
5. Corrections of deviations in the frontal plane: third pelvic correction and shoulder countertraction . . . . .	30
6. Derotation of trunk as part of the fourth pelvic correction and derotation of the shoulder girdle in three-curve scoliosis . . . . .	32
7. Horizontal positioning of the alae of ilium: the fifth pelvic correction . . . . .	32
8. Targeted rotational angular breathing (RAB) combined with counterrotation of the trunk segments . . . . .	33
9. Postural correction of neck and head . . . . .	36
10. Stabilizing isometric tension after postural corrections . . . . .	36
II. Appropriate starting positions and orthopaedic aids for trunk derotation exercises (three-curve scoliosis) . . . . .	37
1. Flat supine position without a pillow . . . . .	37
2. Prone position . . . . .	37
3. Lateral position . . . . .	38
4. Sitting position . . . . .	40
5. Sitting on the heels . . . . .	40
6. 'TV' position . . . . .	40

7. Corrective sitting position when the concavity is extreme . . . . .	41
8. On all fours . . . . .	41
9. Low-sliding position . . . . .	41
10. Kneeling position . . . . .	42
11. Standing . . . . .	42
III. The scoliotically changed locomotor system	
a) Pathological elements . . . . .	42
b) Individual muscles involved in a scoliotic malposture . . . . .	44
1. Abdominal muscles . . . . .	44
2. M. quadratus lumborum and deeper holding musculature . . . . .	46
3. Erector trunci (M. longissimus dorsi, M. iliocostalis), the back extensors . . . . .	48
4. M. iliopsoas muscle . . . . .	52
5. Intrinsic musculature . . . . .	55
6. M. latissimus dorsi . . . . .	57
7. Mm. scaleni . . . . .	58
8. Pectoral muscles . . . . .	59
9. Coccyx and ischial tuberosities . . . . .	59
10. Floating ribs . . . . .	61
IV. Summary of physical corrections using the Schroth method for three-curve scoliosis. . . . .	63
V. Theoretical reflections on four-curve scoliosis (with a lumbosacral curvature) and its correction . . . . .	65
VI. Summary of physical corrections using the Schroth method for four-curve scoliosis . . . . .	72
VII. Feet and legs . . . . .	75
VIII. Summary of theoretical considerations . . . . .	76
IX. Objectives of Schroth treatment. . . . .	77
X. Learning to observe in the Schroth manner . . . . .	78

### PART C

Exercise instructions . . . . .	81
I. Breathing exercises . . . . .	83
II. Exercises at wall bars . . . . .	84
III. Exercises using chair and table . . . . .	94
IV. Floor exercises . . . . .	102
V. Neck exercises . . . . .	114
VI. Exercises with a resistance band . . . . .	119
VII. Exercises to correct lumbosacral curvature & scoliotic pelvis (4th curve) . . . . .	136
VIII. Problems in the treatment of scoliosis . . . . .	144
1. Retroflexion (extension), lateral flexion and distorsion of the trunk . . . . .	144
2. Problem cases . . . . .	153
3. Validity of X-ray monitoring during in-patient treatment . . . . .	166
4. Accessory rotation in lateral flexion of the upper trunk . . . . .	170
5. Puberty . . . . .	171
6. Correction of the shifted sternum . . . . .	171
7. Correction of the shoulder on the concave side . . . . .	173
8. Correction of the anterior rib hump . . . . .	173

9. Correction of flatback in combination with scoliosis .....	173		
10. Correction of the scoliotic pelvis .....	178		
11. Multiple-curve scoliosis .....	180		
12. Atypical scoliosis .....	183		
13. Correction of false body statics .....	183		
14. Lumbar kyphosis .....	185		
15. Spondylolisthesis .....	187		
16. The hollow back .....	188		
17. Rotational slippage of vertebrae .....	190		
18. Thoracolumbar scoliosis .....	191		
19. Double curvatures of the lumbar spine	198		
20. Cervical kyphosis .....	198		
21. Final tensing of the muscle mantle .....	199		
22. Diagnosis of cases of externally invisible minimal scoliosis .....	200		
IX. Therapeutic aids for correction . . . . .	201		
 PART D			
Documentation . . . . .	209		
I. X-ray monitoring and photographs . . . . .	211		
II. Statistical evaluation of treatment results . .	238		
1. Changes in vital capacity .....	238		
2. Changes in breathing movement .....	240		
3. Changes in length of exhalation phase and chest circumference in transverse plane ....	240		
4. Changes in scoliometer values .....	241		
5. Electromyographic changes .....	242		
6. Target muscle control with surface EMG electrodes .....	243		
7. Comparison of X-rays .....	244		
8. Pulse measurements .....	248		
9. Favourable side effects of three-dimensional Schroth treatment...	252		
 PART E			
General Information . . . . .	253		
I. In-patient treatment in the Katharina Schroth-Klinik in Bad Sobernheim . . . . .	255		
II. Orthopaedically-orientated daily life. . . . .	256		
III. Indications and contraindications . . . . .	258		
Appendix. . . . .	259		
What is 'rotational breathing'? . . . . .	259		
Excerpt from the <i>Biologisch-Medizinisches       Taschenbuch</i> 1937 . . . . .	262		
Excerpt from <i>Atemheilkunst</i> , 1956, Dr. Johannes-Ludwig Schmitt . . . . .	262		
6 courses of treatment . . . . .			
1. Report by a 43-year-old female patient.	263		
2. Report by a 65-year-old female patient.	264		
3. Course over 10 years .....	265		
4. Report by an 81-year-old male patient..	267		
5. A letter of an 84-year-old female patient.....	267		
6. A visit of a 32-year-old patient.....	268		
Literature . . . . .	269		
The Schroth book in German and Spanish . . . .	272		
Index . . . . .	274
